INVITATION FOR BID

PUBLIC WORKS CONSTRUCTION

Sealed bids for TRAFFIC LIGHT VIDEO DETECTION UPGRADE VARIOUS LOCATIONS will be received by DPW/Engineering, Town Hall, 25 Center Street, Burlington, Massachusetts, 01803 until 10:00AM on February 12, 2015 and will be publicly opened and read aloud at such time.

- Specifications and bid forms are available on the DPW website at: http://www.burlington.org, under the Projects & Programs tab.

- Specifications and bid forms may be obtained at the DPW/Engineering, 25 Center Street, Burlington, Massachusetts, 01803 on and after January 28, 2015 between 8:30 AM and 4:00 PM for a fifty ($50.00) dollar nonrefundable reproduction fee.

- A bid bond of five (5) percent is required.

- Successful bidder will provide 100% Payment and Performance bonds.

- This project is bid according to MGL 30-39M.

- Prevailing wage shall be paid per MGL 149 SECT. 26-27D
PROJECT DESCRIPTION

The Contractor shall furnish and install a thermal vehicle detection system that detects vehicles on a roadway by processing thermal images sent from a sensor to an interface board with detector outputs that can be received by the traffic signal controller. These thermal traffic sensors shall be installed at the locations shown on the plans and in accordance with these specifications. The thermal detection system also, at a minimum, shall be able to collect and store volume, speed, and classification of vehicles. The locations where this work is to be conducted are:

INSTRUCTIONS TO BIDDERS

1. Receipt and Opening of Bids

The Town of Burlington, Massachusetts, herein called the Owner, acting by and through its Department of Public Works, will receive sealed Bids for TRAFFIC LIGHT VIDEO DETECTION UPGRADE VARIOUS LOCATIONS. Such bids addressed to the DPW/Engineering, Town Hall Annex, 25 Center Street, Burlington, MA 01803, and endorsed Bid for TRAFFIC LIGHT VIDEO DETECTION UPGRADE VARIOUS LOCATIONS will be received at the Office of the Engineering Division as specified in the invitation for Bids at which time and place said bids will be publicly opened and read aloud.

Any bid may be withdrawn prior to the above scheduled time for the opening of bids or authorized postponement thereof. Any bid received after the time and date specified will not be considered. The bidder agrees that this bid shall be good and may not be withdrawn for a period of thirty (30) days, Saturdays, Sundays, and legal holidays excluded, after opening the bids.

2. Location and Work to be Done

The Location of the Work to be done is described in the project description.

The Contractor shall furnish all labor, services, materials, equipment, plant, machinery, apparatus, appliances, tools, supplies, and all other things necessary to do all work required for the completion of each item of the Work and as herein specified.

The Work to be done and paid for under any item shall not be limited to the exact extent mentioned or described but shall include all incidental work necessary or customarily done for the completion of that item.

3. Preparation of Bid

Each bid must be submitted on the prescribed form. All blank spaces for bid prices must be filled in, in ink or typewritten, in both words and figures.

Each bid must be submitted in a sealed envelope bearing on the outside the name of the bidder, his address, and endorsed with the name of the project as specified in Receipt and Opening of Bids.

If forwarded by mail, the sealed envelope containing the bid must be enclosed in another envelope addressed as specified in Receipt and Opening of Bids.
The following sections need to be filled out and completed as part of the bid package;
- Form of General Bid
- Acknowledgement of Addenda, if any
- Bid Form
- Total Bid Price
- Contractor Reference
- Contractor Certification

4. Bid Opening Procedure

The following list of requirements shall apply to each filed bid. Bids not meeting all the requirements for timeliness and security will be rejected without opening; bids not meeting signature and addenda requirements will be rejected prior to checking of bid amounts.

Bids shall be filed at the place and before the time specified in Receipt and Opening of Bids.

Properly executed bid security shall be placed in a sealed envelope and shall be attached to the outside of the envelope containing the bid.

Bid signatures will be checked.

The total dollar amount of each bid will be read, and the three apparent lowest bids will be selected for further consideration. These three apparent low bids will be read aloud for the benefit of the other bidders and the bid opening procedure will be closed. All those present at the bid opening may arrange a time to examine all bids after the bid opening and after the reading of the three apparent low bids.

5. Ability and Experience of Bidder

No award will be made to any bidder who cannot satisfy the Owner that he has sufficient ability and experience in this class of work and sufficient capital and plant to enable him to complete the work successfully within the time named. The Owner’s decision or judgment on these matters will be final, conclusive, and binding.

**Bidder shall have a minimum of five (5) years’ experience and have completed satisfactorily five (5) jobs within that time of similar size and scope.**

**All Subcontractors shall have a minimum of five (5) years’ experience and have completed satisfactorily five (5) jobs within that time of similar size and scope.**

The Contractor must submit with his bid proposal a list of five (5) jobs which he has successfully completed, giving the name and the address of these projects so they can be investigated prior to the award of the contract.
The Owner may make such investigations as he deems necessary, and the bidder shall furnish to the Owner, under oath if so required, all such information and data for this purpose as the Owner may request.

6. Condition of Work

Each bidder must familiarize himself fully with the conditions relating to the construction of the project and the employment of labor thereon. Failure to do so will not relieve a successful bidder of his obligation to furnish all material and labor necessary to carry out the provisions of his Contract. Insofar as possible the Contractor, in carrying out his work, must employ such methods or means as will not cause any interruption of or interference with the work of any other Contractor.

7. Addenda and Interpretations

No interpretation of the meaning of the plans, specifications or other pre-bid documents will be made to any bidder orally. All information given to bidders other than by means of the plans, specifications, or by addenda, as described below, is given informally and shall not be used as the basis of a claim against the Owner.

Every request for such interpretation should be in writing addressed to the DPW/Engineering, Department of Public Works, Town Hall Annex, 25 Center Street, Burlington, MA 01803 and to be given consideration must be received at least seven (7) days prior to the date fixed for the opening of bids. Any and all such interpretations and any supplemental instructions will be in the form of written addenda to the Contract Documents which, when issued, will be mailed by certified mail with return receipt requested to all prospective bidders (at the respective address furnished by them for such purposes), no later than five (5) days prior to the date fixed for the opening of bids. Failure of any bidder to receive any such addendum or interpretation shall not relieve such bidder from any obligation under this bid as submitted. All addenda so issued shall become part of the Contract Documents.

8. Laws and Regulations

The bidder’s attention is directed to the fact that all applicable State laws, municipal ordinances, and the rules and regulation of all authorities having jurisdiction over construction of the project shall apply to the Contract throughout, and they will be deemed to be included in the Contract the same as though herein written out in full.

9. Information Not Guaranteed

All information given in the Contract Documents relating to subsurface and other conditions, natural phenomena, existing pipes, and other structures is from the best sources at present available to the Owner. All such information is furnished only for the information and convenience of bidders and is not guaranteed.
It is agreed and understood that the Owner does not warrant or guarantee that the subsurface or other conditions, natural phenomena, existing pipes, or other structures encountered during construction will be the same as those indicated in the Contract Documents.

If is further agreed and understood that no bidder or Contractor shall use or be entitled to use any of the information made available to him or obtained in any examination made by him in any manner as a basis of or ground for any claim or demand against the Owner or the Engineer, arising from or by reason of any variance which may exist between the information made available and the actual subsurface or other structures actually encountered during the construction work, except as may otherwise be expressly provided for in the Contract Documents.

10. Bid Security

Each bid must be accompanied by a BID BOND, CASH, or, CERTIFIED CHECK, payable to the Town, in the amount stated in INVITATION TO BID. Such checks will be returned to all except the three (3) lowest responsible and eligible bidders within five (5) days, Saturday, Sundays, and legal holidays excluded, after the opening of bids, and the remaining checks will be returned promptly after the Owner and the accepted bidder have executed the Contract, or if no notice of intent to award has been presented to the selected contractor within thirty (30) days, Saturdays, Sundays and holidays excluded, after the date of the opening of bids, upon demand of the bidder at any time thereafter.

The said amount is fixed and agreed upon by and between the Contractor and the Owner because of the impracticability and extreme difficulty of fixing and ascertaining the actual damages the Owner would in such event sustain, and said amount is agreed to be the amount of damages which the Owner would sustain and said amount shall be retained from time to time by the Owner from current periodical estimates.

11. Right to Reject Bid

The Owner reserves the right to waive any informality or reject any and all bids and alternate bids, should the Owner deem it to be in the public interest to do so.

The Owner also reserves the right to reject the bid of any bidder that the Owner considers to be unqualified based on the criteria set forth in Article 5 herein.

12. Time for Completion

The bidder must agree to commence work and to fully complete the project within the time limit stated in SPECIAL CONDITIONS.

13. Comparison of Bids

In the event that there is a discrepancy in FORM OF GENERAL BID between the lump sum or unit prices written in words and figures, the prices written in words will govern.
14. Rule for Award of Contract

The Contract will be awarded to “the lowest responsible and eligible bidder” for the Total Price Bid pursuant to General Laws Chapter 30, Section 39M, as amended. Such a bidder shall possess the skill ability and integrity necessary for the faithful performance of the work, shall be able to furnish labor that can work in harmony with all other elements of labor employed, or to be employed, in the work, and shall otherwise comply with all applicable provisions of law. Bidder shall execute formal agreement within ten (10) days of the Notice of Award.

15. Statutes Regulating Competitive Bidding

Any bid that does not comply with the provisions of Massachusetts General Laws Chapter 30, Section 39M as amended, need not be accepted and the Owner may reject every such bid.

16. Wage Rates

Prevailing Wage Rates as determined by the Commissioner of Department of Labor and Industries under the provision of the Massachusetts General Laws, Chapter 149, Section 26 to 27G, as amended, apply to this project. It is the responsibility of the contractor, before bid opening to request if necessary, any additional information on Prevailing Wage Rates for those trades people who may be employed for the proposed work under this contract.

State schedules of Prevailing Wage Rates are included in the contract documents.

17. Specifications

All specifications and bid items are based on Massachusetts Highway Departments “Standard Specifications for Highway & Bridges” edition as revised in the 1995 Publication.

18. Bid Items Not Guaranteed

The successful bidder is not guaranteed all items or the total bid price under this contract. Bidders must understand that like items will be bid under other contracts specifically packaged as one complete project. The successful bidder has no right to similar items bid under other projects. The Town Engineer will specify where and when this contract will be applied to undertake a particular improvement.
FORM OF GENERAL BID

Bid of ____________________________________ (hereinafter called “Bidder”)*

(____) a corporation, organized and existing under the laws of the state of ___________.

(____) a partnership

(____) a joint venture

(____) an individual doing business as ___________________________________

To the Town of Burlington, Massachusetts (hereinafter called “Owner”).

Gentlemen:

The bidder, in compliance with your invitation for bid, examined the Contract Documents and being familiar with all of the conditions surrounding the construction of the proposed project including the availability of materials and labor, hereby propose to furnish all labor, materials, and supplies, and to construct the project in accordance with the Contract Documents within the time set forth in the agreement, and at the prices stated below. These prices are to cover all expenses incurred in performing the work required under the Contract Documents, or which this proposal is a part.

*Insert corporation, partnership or individual as applicable.

Town Accountant Date
SPECIAL CONDITIONS

1. All work under this contract must comply with the most recent edition of the Town of Burlington Department of Public Works; Street Opening/Utility Connection Rules & Regulations.

2. Prior to the commencement of any work the Contractor will obtain a Street Opening permit from the DPW/Engineering Division.

3. At the end of each week the Contractor shall submit an itemized summary/quantities of items per street completed during the week. These quantities will be reviewed with the Engineer before the end of the day on Friday.

4. All certified payroll slips must be submitted as part of the pay requisition package for each individual pay requisition request, for each contractor and sub-contractor that has performed work under this contract, up to date of the current pay requisition before the pay requisition will be processed and paid.

5. The commencement date for the contract work shall be March 2, 2015 or 14 days after the Owner issues the Notice to Proceed, whichever date is earlier. The Contractor shall have 60 calendar days to complete the work in this contract. If work is not completed within this date range, liquated damages of $1,000.00 per day will be assed each calendar day the work is not completed.

6. The Contractor shall have a designated Project Manager, or a designated Foreman, in the field at all times while work is taking place. The Project Manager or designated Foreman shall have the authority to agree on quantities and items with the Engineer and have all decision making ability on behalf of the Contractor. This person shall also be responsible for the location/re-location of all traffic signs and traffic barrels as specified in the Traffic Management Plan or as directed by the Engineer.

7. The Contractor shall be responsible for all traffic management components, except the costs of Police Details, and shall be considered incidental to the contract price. The Contractor shall provide all necessary cones, barrels, signage, and any other traffic control devices as directed by the assigned Police Detail.

GENERAL CONDITIONS

ARTICLE 1

CONTRACT DOCUMENTS

1.1 DEFINITIONS

1.1.1 THE CONTRACT DOCUMENTS
The Contract Documents consist of the Owner-Contractor Agreement, the Conditions of the Contract (General, and other Conditions), the Drawings, the Specifications, all Addenda issued prior to and all Change Orders issued after execution of the Contract, and all applicable laws, ordinances and regulations. The Contract Documents include Bidding Documents such as the Advertisement or Invitation to Bid, the Instructions to Bidders, sample forms, the Contractor’s Bid or portions of Addenda relating to any of these, or any other documents, specifically enumerated in the Owner-Contractor Agreement.

1.1.2 THE CONTRACT
The Contract Documents form the Contract for Construction. This Contract represents the entire and integrated agreement between the parties hereto and supersedes all prior negotiations, representations, or agreements, either written or oral. The Contract may be amended or modified only by a written Change Order.

1.1.3 THE WORK
The Work comprises the completed construction required by the Contract Documents and includes all labor necessary to produce such construction, and all materials and equipment incorporated in such construction.

1.1.4 THE PROJECT
The project is the total construction of which the Work performed under the Contract Documents may be the whole or a part.

1.1.5 OR EQUAL
The use of the words “Or Equal” following the name of any manufacturer, vendor or proprietary product shall be understood to mean that articles or materials may be substituted which, in the opinion of the Owner, are equal in quality, durability, appearance, strength, design and performance to the articles or materials named or described and will perform adequately in providing a first-class facility.
When submitting shop drawing information on articles or materials which are being proposed as substitutes for specified items, the Contractor shall clearly identify them as such. If the articles or materials are accepted as equal to those on which dimensions on the drawings are based, any dimensional variance from those shown and/or specified shall be shown on the shop drawings prepared by the Contractor, illustrating the manner in which conformity to dimensions and design is to be obtained. All such drawings shall be subject to the approval of the Owner and the installation of the article shall not proceed without first obtaining said approval.
1.2 EXECUTION, CORRELATION AND INTENT

1.2.1
By executing the Contract, the Contractor represents that he has visited the site, familiarized himself with the local conditions under which the Work is to be performed, and correlated his observations with the requirements of the Contract Documents.

1.2.2
The intent of the Contract Documents is to include all items necessary for the proper execution and completion of the Work. The Contract Documents are complementary, and what is required by any one shall be as binding as if required by all. Work not covered in the Contract Documents will not be required unless it is consistent therewith and is reasonably inferable there from as being necessary to produce the intended results. Words and abbreviations which have well-known technical or trade meanings are used in the Contract Documents in accordance which such recognized meanings.

1.2.3
The Notice to Proceed will come in the form of a written letter to the Contractor. Once the written Notice to Proceed has been received by the Contractor, that date will be legal start date for work under the Contract.

In the event of a failure to issue a Notice to Proceed written document specifying the commencement date, the pre-construction meeting date will serve as the Notice to Proceed date.

1.3 OWNERSHIP AND USE OF DOCUMENTS

1.3.1
All Drawings, Specifications and copies thereof furnished by the Owner are and shall remain the Owner’s property. They are to be used only with respect to this Project and are not to be used on any other project without prior written consent of the Owner. With the exception of one contract set for each party to the Contract, such documents are to be returned or suitably accounted for to the Owner at the completion of the Work. Submission or distribution to meet official regulatory requirements or for other purposes in connection with the Project is not to be construed as publication in derogation of any reserved rights.
ARTICLE 2

ADMINISTRATION

2.1 ADMINISTRATION OF THE CONTRACT

2.1.1 The designated representative of the Owner or its Engineer will visit the site at intervals appropriate to the stage of construction to familiarize himself generally with the progress and quality of the Work and to determine in general if the Work is proceeding in accordance with the Contract Documents. However, the Owner’s Representative or Engineer will not be required to make exhaustive or continuous on-site inspections to check the quality or quantity of the Work.

2.1.2 The Owner shall at all times have access to the Work whenever it is in preparation and progress. The Contractor shall provide facilities for such access so the Owner may perform its functions under the Contract Documents.

2.1.3 The Owner shall make payments for completed work, as approved by the Owner, in accordance with M.G.L. Ch. 30, Sec. 39G. A five percent retainage will be deducted from periodic payments to the Contractor.

2.1.4 The Owner will render information necessary for the proper execution or progress of the Work within twenty (20) days of any request by the contractor or in accordance with any time limit agreed upon.

2.1.5 The Owner will have authority to reject Work which does not conform to the Contract Documents. Whenever, in his opinion, he considers it necessary or advisable for the implementation of the intent of the Contract Documents, he will have authority to require special inspection or testing of the Work whether or not such Work is then fabricated, installed or completed. Any such rejection of work shall not relieve the Contractor of the responsibility for maintaining protection of the Work and the Owner’s property.

2.1.6 The Owner or its Engineer will review and approve or take other appropriate action upon Contractor’s submittals such as Shop Drawings, Product Data and Samples, but only for conformance with the design concept of the Work and with the information given in the Contract Documents. Such action shall be taken with reasonable promptness so as to cause no delay. The Owner’s approval of a specific item shall not indicate approval of an assembly of which the item is a component.
2.1.7
The Owner will conduct inspections to determine the date of Substantial Completion and Final Completion, will review written warranties and related documents required by the Contract and assembled by the Contractor, and will issue a final Certificate for Payment.
ARTICLE 3

OWNER

3.1 DEFINITION

3.1.1 The Owner is the person or entity identified as such in the Owner-Contractor Agreement and is referred to throughout the Contract Documents as if singular in number and masculine in gender. The term Owner means the Owner or his authorized representative, which for this Project shall be the Town Engineer.

3.1.2 The Engineer for the Project shall be the Town of Burlington Engineering Division.

3.2 INFORMATION AND SERVICES REQUIRED OF THE OWNER

3.2.1 The Owner shall, at the time of execution of the Agreement and any subsequent Change Orders, certify for the Contractor that financial arrangements have been made to fulfill the Owner’s obligations under the Contract.

3.2.2 The Owner shall furnish all documents describing the work.

3.2.3 Except as provided in Subparagraph 4.7.1. Owner shall secure and pay for necessary approvals, easements, assessments and charges required for the construction, use or occupancy of permanent structures or for permanent changes in existing facilities.

3.2.4 Information or services under the Owner’s control shall be furnished by the Owner with reasonable promptness to avoid delay in the orderly progress of the Work.

3.2.5 The Owner will furnish the Contractor with three (3) copies of all Drawings and Specifications and revisions issued during the progress of the Work; all additional copies will be furnished upon request at the cost of reproduction.

3.2.6 The Owner, through its designated agent or Engineer, shall forward all instructions directly to the Contractor.
3.3 OWNER’S RIGHT TO STOP THE WORK

3.3.1 If the Contractor fails to correct defective Work as required by the Owner or fails to carry out the Work in accordance with the Contract Documents or if the Owner shall for any other reason so require, the Owner, by a written order signed personally or by an agent specifically so empowered by the Owner in writing, may order the Contractor to stop the Work, or any portion thereof, until the cause for such order has been eliminated or until further written notice from the Owner; however, this right of the Owner to stop the Work shall not give rise to any duty on the part of the Owner to exercise this right for the benefit of the Contractor or any other person or entity. The Contractor shall resume the Work after such stoppage promptly upon written notice to do so from the Owner. If such stoppage is required through no fault of the Contractor, the Contract Time (and the dates for achieving Substantial Completion and Final Completion) shall be extended by a period equal to the period of the stoppage, and the Contractor shall be compensated for its reasonable and justifiable cost incurred as a result of such stoppage.

3.4 OWNER’S RIGHT TO CARRY OUT THE WORK

3.4.1 If the Contractor defaults or neglects to carry out the Work in accordance with the Contract Documents and fails within seven days after receipt of written notice from the Owner to commence and continue correction of such default or neglect with diligence and promptness, the Owner may, without prejudice to any other remedy he may have, perform such work or cause such work to be performed and/or make good such deficiencies. In such case an appropriate Change Order shall be issued deducting from the payments then or thereafter due the Contractor the cost of correcting such deficiencies, including compensation for additional services made necessary by such default, neglect or failure. If the payments then or thereafter due the Contractor are not sufficient to cover the amount, the Contractor shall pay the difference to the Owner.

3.5 OWNER’S RIGHT TO TERMINATE CONTRACT

3.5.1 The Town reserves the right to terminate this Contract at their discretion with thirty (30) with written notice to the contractor. In the event of Contract termination, all finished or unfinished work, or un-used material, already paid for under Contract prices, shall become the property of the Town of Burlington.
ARTICLE 4

CONTRACTOR

4.1 DEFINITION

4.1.1
The Contractor is the person or entity identified as such in the Owner-Contractor Agreement and is referred to throughout the Contract Documents as if singular in number and masculine in gender. The term Contractor means the Contractor or his authorized representative.

4.2 REVIEW OF CONTRACT DOCUMENTS

4.2.1
The Contractor shall carefully study and compare the Contract Documents and shall at once report to the Owner any error, inconsistency or omission he may discover. The Contractor shall not be liable to the Owner for any damage resulting from errors, inconsistencies or omissions in the Contract Documents which he discovers but shall be liable for damage to the extent he reasonably should have but failed to discover such errors, inconsistencies or omissions. The Contractor shall perform no portion of the Work at any time without Contract Documents or, where required, approved Shop Drawings, Product Data or Samples for such portion of the Work.

4.3 SUPERVISION AND CONSTRUCTION PROCEDURES

4.3.1
The Contractor shall supervise and direct the Work, using his best skill and attention which shall not be less than such state of skill and attention generally rendered by the contracting profession for projects similar to the Project in scope, difficulty and location. The Contractor shall maintain adequate supervisory personnel at the Site during the performance of the Work. He shall be solely responsible for all construction means, methods, techniques, sequences and procedures and for coordinating all portions of the Work under the Contract.

4.3.2
The Contractor shall be responsible to the Owner for the acts and omissions of his employees, Subcontractors and their agents and employees, and other persons performing any of the Work under a contract with the Contractor. This obligation shall also extend to the presence on the Site of suppliers of materials or equipment, their employees, contractors, and agents engaged in the work.

4.3.3
The Contractor shall not be relieved from his obligations to perform the Work in accordance with the Contract Documents either by the activities or duties of the Owner in its administration of the Contract.
4.4 LABOR AND MATERIALS

4.4.1 Unless otherwise provided in the Contract Documents, the Contractor shall provide and pay for all labor, materials, equipment, tools, construction equipment and machinery, water, heat, utilities, transportation, and other facilities and service necessary for the proper execution and completion of the Work, whether temporary or permanent and whether or not incorporated or to be incorporated in the Work.

4.4.2 The Contractor shall at all times enforce strict discipline and good order among his employees and shall not employ on the Work any unfit person or anyone not skilled in the task assigned to him including all persons on the Site controlled directly or indirectly by the Contractor.

4.5 WARRANTY

4.5.1 The Contractor warrants to the Owner that all materials and equipment furnished under this Contract will be new and of recent manufacture unless otherwise permitted in writing by the Owner and that all Work will be of good quality, free from faults and defects and in conformance with the Contract Documents. All Work not conforming to these requirements, including substitutions not properly approved and authorized, may be considered defective and, promptly after written notification of non-conformance, shall be repaired or replaced by the Contractor with Work conforming to such requirements. If required by the Owner, the Contractor shall furnish satisfactory evidence as to the kind and quality of materials and equipment.

4.6 TAXES

4.6.1 The Contractor shall pay all applicable sales, consumer, use and other similar taxes for the Work or portion thereof provided by the Contractor which are legally enacted at the time bids are received, whether or not yet effective.

4.7 PERMITS, FEES AND NOTICES

4.7.1 Unless otherwise expressly provided in the SPECIAL CONDITIONS, the Contractor shall secure and pay for all permits and fees, licenses and inspections necessary for the proper execution and completion of the Work which are customarily secured after execution of the Contract and which are legally required at the time the bids are received, and the same shall at all times be the property of the Owner and shall be delivered to the Owner upon completion of the Project.
4.7.2
The Contractor shall give all notices and comply with all federal, state and local laws, ordinances, rules, regulations and lawful orders of any public authority bearing on the performance of the Work. The Contractor shall provide the Owner with reproductions of all permits, licenses and receipts for any fees paid. The Owner represents that it has disclosed to the Contractor all orders and requirements known to the Owner of any public authority particular to this Contract.

4.7.3
If the Contractor observes that any of the Contract Documents are at variance with applicable laws, statutes, codes and regulations in any respect, he shall promptly notify the Owner in writing, and any necessary changes shall be accomplished by appropriate Modification.

4.7.4
If the Contractor performs any Work which he knows or should know is contrary to such laws, ordinances, rules and regulations, and without such notice to the Owner, he shall assume full responsibility therefore and shall bear all costs attributable thereto.

4.8  SUPERINTENDENT

4.8.1
The Contractor shall employ a competent superintendent and necessary assistants who shall be in attendance at the Project site at all times during the progress of the Work. The superintendent shall represent the Contractor and all communications given to the superintendent shall be as binding as if given to the Contractor. Important communications shall be confirmed in writing. Other communications shall be so confirmed on written request in each case.

4.9  PROGRESS SCHEDULE

4.9.1
The Contractor, immediately after being awarded the Contract, shall prepare and submit for the Owner’s information an estimated progress schedule for the Work. The progress schedule shall be related to the entire Project to the extent required by the Contract Documents, and shall provide for expeditious and practicable execution of the Work. No work shall start without the Project schedule. The Contractor shall submit the project schedule five days prior to start the work.

4.10  DOCUMENTS AND SAMPLES AT THE SITE

4.10.1
The Contractor shall maintain at the site for the Owner one record copy of all Drawings, Specifications, Addenda, Change Orders and other Modifications, and “As-Built”
Drawings and Specifications in good order and marked currently to record all changes made during construction, and approved Shop Drawings, Product Data and Samples. These shall be available to the Owner upon completion of the Work.

4.11 SHOP DRAWINGS, PRODUCT DATA AND SAMPLES

4.11.1 Shop Drawings are drawings, diagrams, schedules and other data specially prepared for the Work by the Contractor or any Subcontractor, manufacturer, supplier or distributor to illustrate some portion of the Work.

4.11.2 Product Data are illustrations, standard schedules, performance charts, instructions, brochures, diagrams and other information furnished by the Contractor to illustrate a material, product or system for some portion of the Work.

4.11.3 Samples are physical examples which illustrate materials, equipment or workmanship and establish standards by which the Work will be judged.

4.11.4 The Contractor shall review, approve and submit, with reasonable promptness and in such sequence as to cause no delay in the Work or in the work of the Owner or any separate contractor, all Shop Drawings, Product Data and Samples required by the Contract Documents.

4.11.5 By approving and submitting Shop Drawings, Product Data and Samples, the Contractor represents that he has determined and verified all material, field measurements, and field construction criteria related thereto, or will do so, and that he has checked and coordinated the information contained within such submittals with the requirements of the Work and of the Contract Documents.

4.11.6 The Contract shall not be relieved of responsibility for any deviation from the requirements or the Contract Documents by the Owner’s approval of Shop Drawings, Product Data or Samples or the Engineer’s approval of the same unless the Contractor has specifically informed the Owner or Engineer in writing of such deviation at the time of submission and the Owner or Engineer has given written approval to the specific deviation. The Contract shall not be relieved from responsibility from errors or omissions in the Shop Drawings, Product Data or Samples by the Owner’s approval thereof.

4.11.7
The Contractor shall direct specific attention, in writing or on resubmitted Shop Drawings, Product Data or Samples, to revisions other than those requested by the Owner or its Engineer on previous submittals.

4.11.8
No portion of the Work requiring submission of a Shop Drawing, Product Data or Sample shall be commenced until the submittal has been approved by the Owner or Engineer. All such portions of the Work shall be in accordance with approved submittals.

4.12 USE OF SITE

4.12.1
The Contractor shall confine operations at the site to areas permitted by law, ordinances, permits and the Contract Documents and shall not unreasonably encumber the site with any materials or equipment.

4.13 CUTTING AND PATCHING OF WORK

4.13.1
The Contractor shall be responsible for all cutting, fitting or patching that may be required to complete the Work or to make its several parts fit together properly.

4.13.2
The Contractor shall not damage or endanger any portion of the Work or the work of the Owner or any separate contractors by cutting, patching or otherwise altering any work or by excavation. The Contractor shall not cut or otherwise alter the work of the Owner or any separate contractor except with the written consent of the Owner and of such separate contractor. The Contractor shall not unreasonably withhold from the Owner or any separate contractor his consent to cutting or otherwise altering the Work.

4.14 CLEANING UP

4.14.1
The Contractor at all times shall keep the premises free from accumulation of waste materials or rubbish caused by his operations. At the completion of the Work he shall remove all his waste materials and rubbish from and about the Project in full compliance with all applicable laws and regulations as well as all his tools, construction equipment, machinery and surplus materials and the Project shall be thoroughly cleaned and ready for immediate occupancy by the Owner.

4.14.2
If the Contractor fails to clean up at the completion of the Work, the Owner may do so as provided in Paragraph 3.4 and the cost thereof shall be charged to the Contractor.

4.15 COMMUNICATIONS
4.15.1
The Contract shall forward all communications to the Owner through its Town Engineer, Town Hall Annex, 25 Center Street, Burlington, MA 01803.

4.16.2
The Contractor shall at all times have a designated representative in the field that is authorized to act on behalf and make decisions for the Contractor under this contract agreement.

4.16 ROYALTIES AND PATENTS

4.16.1
The Contractor shall pay all royalties and license fees. He shall defend all suits or claims for infringement of any patent rights and shall save the Owner harmless from loss on account thereof, except that the Owner shall be responsible for all such loss when a particular design, process or the product of a particular manufacturer or manufacturers is specified, but if the Contractor believes or has reason to believe that the design, process or product specified is an infringement of a patent, he shall be responsible for such loss unless he promptly gives such information to the Owner, and thereafter the Owner insists on the use of the design, process or products specified.

4.17 INDEMNIFICATION

4.17.1
To the fullest extent permitted by law, the Contractor shall indemnify and hold harmless the Owner, the Engineer and their agents and employees from and against all claims, damages, losses and expenses, including but not limited to attorney’s fees, arising out of or resulting from the performance of the Work, provided that any such claim, damage, loss or expense (1) is attributable to bodily injury, sickness, disease or death, or to injury to or destruction of tangible property (other than the Work itself) including the loss of use resulting there from, and (2) is caused in whole or in part by any negligent act or omission of the Contractor, any Subcontractor, anyone directly or indirectly employed by any of them or anyone for whose acts any of them may be liable, regardless of whether or not it is caused in part by a party indemnified there under. Such obligation shall not be construed to negate, abridge, or otherwise reduce any other right or of indemnity which would otherwise exist as to any party or person described in this Paragraph 4.17.

4.17.2
In any and all claims against the Owner the Engineer or any of their agents or employees by any employee of the Contractor, any Subcontractor anyone directly or indirectly employed by any of them or anyone for whose acts any of them may be liable, the indemnification obligation under this Paragraph 4.17 shall not be limited in any way by any limitation on the amount or type of damages, compensation or benefits payable by or for the Contractor or any Subcontractor under workers’ or workmen’s compensation acts, disability benefit acts or other employee benefit acts.
4.17.3
The obligations of the Contractor under this paragraph 4.17 shall not extend to the liability of the Owner, the Engineer, their agents or employees, arising out of (1) the preparation or approval of maps, drawings, opinions, reports, surveys, change orders, designs or specifications, or (2) written directions or instructions given by the Owner, the Engineer, their agents or employees, provided they are the sole cause of the injury or damage.
ARTICLE 5

INSURANCE

Contractor shall provide insurance as specified below:

General Liability
Includes:
- Comprehensive form
- Premises/Operations
- Underground Explosion & Collapse Hazard
- Products / Completed Operations
- Independent Contractors
- Broad From Property Damage
- Personal Injury

<table>
<thead>
<tr>
<th>Each Occurrence</th>
<th>$1,000,000</th>
</tr>
</thead>
<tbody>
<tr>
<td>Aggregate</td>
<td>$2,000,000</td>
</tr>
</tbody>
</table>

Automobile Liability
Includes:
- All Owned Vehicles
- Hired Vehicles
- Non-owned Vehicles

| Bodily Injury & Property Damage Combined | $1,000,000 |

Workers Compensation & Employers Liability
- As Required by State of Massachusetts

| Bodily Injury by Disease (Policy Limit) | $500,000 |
| Bodily Injury by Disease (Each Employee) | $100,000 |
| Each Accident                          | $100,000 |

Additional Insurance / Requirements
- The Town of Burlington Shall be named as Additional Insured
6. LIQUIDATED DAMAGES

If the Contractor shall neglect, fail or refuse to complete the work within the time herein specified, or any proper extension thereof granted by the Owner, then the Contractor does hereby agree, as a part consideration for the awarding of this Contract, to pay to Owner the amount of $1,000 per day, not as a penalty but as liquidated damages for such breach of Contract as hereinafter set forth, for each and every calendar day that the Contract shall be in default after the time stipulated in the Contract for completing the work.
SPECIFICATIONS

THERMAL VEHICLE DETECTION SYSTEM

The Contractor shall furnish and install a thermal vehicle detection system that detects vehicles on a roadway by processing thermal images sent from a sensor to an interface board with detector outputs that can be received by the traffic signal controller. These thermal traffic sensors shall be installed at the locations shown on the plans and in accordance with these specifications. The thermal detection system also, at a minimum, shall be able to collect and store volume, speed, and classification of vehicles.

Requirements - The thermal vehicle detection systems supplied shall meet the following minimum requirements:

1. The detection system must be non-intrusive (i.e. above ground) and shall consist of:
   a. Mounting bracket
   b. Thermal traffic sensor and detection module
   c. Communications cable
   d. Interface board

2. The thermal traffic sensor and detection module must be integrated in one housing without the need for any additional detection software outside of this housing. By using one or more predefined detection zones, the detection software will have the ability to detect vehicles and bicycles on multiple lanes. Bicycle detection zones will be separate from vehicle detection zones and will utilize a different set of detection algorithms.

3. The detection software will have the ability to differentiate between vehicles and bicycles with a high level of accuracy and allow for separate outputs to be used for vehicle presence and bicycle presence.

4. The detection system shall generate separate vehicle and bicycle presence events and counting data. The generated vehicle and bicycle presence events will be sent to a traffic light controller.

5. In one or more predefined virtual detection zones, the detection software will detect both moving and stopped vehicles on multiple lanes when mounted 13-40 ft. above the street’s surface, taking into account optical occlusion constraints.

6. In total, it must be possible to put 24 virtual detection zones in the image. Logical functions (AND, OR) shall be used to link multiple virtual detection zones to a single output. Detection must be in any direction through the image and in more than 1 direction.
7. Vehicle count and zone occupancy data generation shall be possible.

8. In one or more predefined virtual detection zones, the detection software will detect both moving and stopped bicycles on multiple lanes when mounted 13-40 ft. above the street’s surface, taking into account optical occlusion constraints. The software shall differentiate bikes from other vehicles.

9. In total, it must be possible to put 4 virtual detection zones in the image.

10. Storage of bicycle count information shall be possible.

11. The total mass of the bracket, housing, sensor and detection module (excluding cabling) shall be less than 2.3 lb.

12. The operator shall be able to view the streaming video images of the detection system using a web browser.

**Mounting Brackets:**

1. The mounting brackets allows horizontal and vertical mounting and is made of fiber reinforced polyamide (with an aluminum tube). To attach the housing on existing or new infrastructure, it is sufficient to use 2 bolts or 2 stainless steel bands.

2. The mounting brackets shall have a total size with thermal sensor attached of:
   - Vertically mounted of 17.71” x 6.29” x 4.72”
   - Horizontally mounted of 16.14” x 7.08” x 4.72”

**Thermal Detection sensor and Detection Module:**

1. The housing of the sensor and detection module must be compact, esthetical, have an integrated rain/sun shield and be made of aluminum.

2. A red detection LED, clearly visible from the ground, allows both the vehicle drivers and maintenance personnel to see the status of the detection module (i.e. detection, boot mode, safe status).

3. The thermal traffic sensor shall not depend on any visible or invisible (infrared) illumination or image intensifier to “see” i.e. produce images.

4. The thermal traffic sensor shall be totally passive and not produce any energy or emit light in any bandwidth. The thermal traffic sensor shall allow the user to clearly identify images in the total absence of light.
5. The thermal traffic sensor shall utilize a Vanadium Oxide (VOx) uncooled micro bolometer responding in the LWIR (Long Wave Infrared) spectral range of 7.5 – 13.5 μm.

6. The thermal traffic sensor shall be based on Vanadium Oxide (VOx) micro bolometer detector technology, and shall not be susceptible to permanent damage after imaging the sun.

7. The thermal traffic sensor shall not utilize dynamic apertures to protect the image sensor.

8. The thermal traffic sensor shall provide a thermal optics that automatically adjusts to background thermal changes, and therefore does not require re-adjustment and/or thermal refocusing.

9. The thermal traffic sensor shall not be susceptible to “image blooming” caused by bright lights as are image intensifiers and visible spectrum sensors.

10. The thermal traffic sensor shall be factory configured with an anti-reflection hard carbon coated Germanium lens.

11. The thermal traffic sensor image sensor shall provide a Noise Equivalent Temperature Difference (NETD) of < 75mk, <50mK f/1.0 or lower.

12. The thermal traffic sensor shall include Auto Digital Detail Enhancement (Auto DDE) which is an advanced non-linear image processing algorithm. The Auto DDE function is fully automatic and requires no input or adjustment from the user. The Auto DDE shall enhance the image detail to match the total dynamic range of the original image allowing details to be visible to the user even in scenes with low or high thermal contrast. Auto DDE will increase the probability of detection of low contrast images. These settings shall be optimized for performance with Traffic Thermal Detection.

13. The thermal traffic sensor shall utilize Non-Uniformity Correction (NUC) which is a set of compensation factors for each pixel. NUC shall enable the following features and benefits:
   a. Eliminate the need for FPA (Focal Plane Array) temperature stabilization.
   b. Allow for near instantaneous sensor turn-on.
   c. Reduced system complexity and power consumption.
   d. Allow for a wider operating temperature range.

14. The thermal traffic sensor shall include Automatic Gain Control (AGC) circuitry to compensate for scene variations, improve image quality by avoiding saturation.
and distortion, and to balance signal levels prior to display to maximize image quality.

15. The thermal traffic sensor shall feature a White-Hot operating mode. In the White-Hot mode warmer objects will be displayed in white or lighter shades than cooler or background areas.

16. The thermal traffic sensor shall provide IP video stream.

17. The thermal traffic sensor shall have a total diameter of 4.72”.

18. The detection system supports streaming video in MJPEG, MPEG-4 and H.264 format. The bit rate and frame rate of the video stream must be user-configurable.

19. To store the gathered count data, the detection module must have an on-board memory of at least 2 weeks under the following configuration parameters: 2 detection zones, differentiated counts for bicycles and vehicles, 5 minute integration intervals.

20. For data collection, the detection module is able to work as a stand-alone system, in which case it is possible to connect a portable PC directly to the detection module interface board using the TCP/IP connection. In this setup, the detection module will store the gathered traffic data and traffic events in its internal memory. Data is downloaded by connecting a portable PC to the detection module interface TCP/IP port.

21. The detector will support the following stand-alone functionalities:

   a. Integrated Data Collection for vehicle presence, with user selectable data interval:
      1. Date and time
      2. Zone number
      3. Number of vehicles per vehicle presence zone
      4. Zone occupancy per vehicle presence zone

   b. Integrated Data Collection for bicycle presence, with user selectable data interval:
      1. Date and time
      2. Zone number
      3. Number of bicycles per bicycle presence zone

22. For data collection, the detection module can also be used in combination with a fixed link that provides the captured data to a remote traffic management system.
for immediate interpretation. In this setup the detector shall be connected directly to a network using the TCP/IP connection on the interface board.

23. The detector will support the following network-based functionalities by (monitoring of data and events over TCP/IP):

   a. Integrated Data Collection for vehicle presence, with user selectable data interval:
      1. Date and time
      2. Zone number
      3. Number of vehicles per vehicle presence zone
      4. Zone occupancy per vehicle presence zone

   b. Integrated Data Collection for bicycle presence, with user selectable data interval:
      1. Date and time
      2. Zone number
      3. Number of bicycles per bicycle presence zone

24. The detection module is capable of operating at 24VDC, provided to the sensor via the interface board. Its power consumption will not exceed 5W (or 210mA at 24V) during regular operations.

25. The detection module will be compatible with NEMA TS2 (Traffic controller assemblies’ product standard).

26. The detection module will comply with FCC Title 47 Part 15 Subpart B.

27. The detection module will comply with applicable CE directives.

   a. Electromagnetic Compatibility directive 2004/108/EG
   b. Safety – Low voltage directive 2006/95/EC
   c. Reduction of hazardous substances directive 2011/65/EU

28. The detection module will be capable of operating between -40°F and +165°F.

29. The detection module will be UV resistant.

30. The detection module will be mechanical protected according to IP67 and IK07.

**Communication Cable:**

1. The communications cable shall be 20 AWG (7/28) stranded tinned copper insulated with semi-rigid PVC and paired. Each pair isolated shielded with aluminum/polyester tape and 22 AWG stranded tinned copper drain wire. Pairs cabled on common axis, reducing diameter, and jacketed with chrome gray PVC.
2. The communications cable shall have the following requirements:

   a. Numbered of paired wires 2.
   b. Insulation thickness of .010”.
   c. Jacket thickness of .032”.
   d. Nominal diameter of .225”.
   e. Color coded wires shall be Black and Red, Green and White.

**Interface Board:**

1. The interface board is used for system configuration, detection verification, detection output generation and error output generation. It will be an EDGE card for NEMA TS2 cabinet. It allows connection to up to 8 detection modules and has an Ethernet connection to communicate with a PC. The interface board provides 4 contact closures (detection outputs) – 1 per detection module – for the traffic signal controller.

2. If more than 4 detection outputs are necessary, one or more EDGE expansion boards, each with 4 contact closures, will be available and connected to the interface.

3. Communication between the interface board and the different sensors shall be established over BPL (Broadband over Power Lines), limiting the number of wires per sensor to maximum 3 (BPL+, BPL-, Ground).

4. The interface board shall provide for NEMA TS2 SDLC communications via an optional Port 1 Interface Edge Card. The interface board shall communicate to the optional Port 1 Interface Edge Card via a RS485 serial communication path.

**Installation:**

1. The manufacturer of the thermal vehicle detection system, or their representative, shall design sensor layout, placement and lens size, and supervise the installation and testing of the equipment. A factory certified representative from the supplier shall be on-site for a minimum of one day.

2. The manufacturer shall provide 3 complete sets of maintenance manuals for the installed equipment. These manuals shall have complete set-up, maintenance and troubleshooting procedures presented in an organized format.

**Warranty, Maintenance and Support:**

1. The thermal traffic sensor engine shall be warranted by its supplier for a minimum of ten (10) years.
2. The thermal traffic vehicle detection system shall be warranted by its supplier for a minimum of two (2) years.

3. During the warranty period, the supplier shall provide technical support by telephone during normal business hours and request for support by telephone shall be answered by factory certified personnel within one (1) hour.

4. During the warranty period, certified personnel from the supplier shall be on site within seventy-two (72) hours if required.

**Video Software Management System:**

**General** – The Contractor shall provide and install a stand-alone Video Management System (VMS) software platform for use with the thermal video detection system shall be capable to operate on the Town’s Video Management System (Note: this Video Management System is being constructed by others as part of the Transportation Improvement Project for Burlington Mall Road at New England Executive Park Drive).

**Measurement and Payment:**

The work for all items listed on the Bid Form shall consist of furnishing and installing thermal vehicle detection systems for all intersection approaches at each bid item intersection. The measurement of work shall be based on each intersection the work is performed at.

Payment for each item/intersection will be made in lump sum payments for each item/intersection which work is fully completed. Payments for partially finished work will not be made.
APPENDIX A
PROJECT LOCUS
APPENDIX B

PREVAILING WAGE RATES

*Wage rates can be obtained on Town’s DPW Department page at www.burlington.org under the Projects & Programs link.
