TIME AS A PUBLIC HEALTH CONTROL

Time as a Public Health Control (TPHC): Food Code 3-501.19 allows the use of TIME only instead of temperature to store TCS foods out of temperature control for a specific time period as noted at right.

EXAMPLES

**Pizza, Calzones
Sushi Rice
Hollandaise Sauce
Béarnaise Sauce
Raw Shelled Eggs
Cut Fruit & Vegetables
Food on Buffets
Waffle or Crepe Batter**

Food Establishments serving Highly Susceptible Populations (HSP) cannot use TPHC for raw eggs.

A variance from the Board of Health is no longer required, however food establishments shall have written procedures on site and available to the food inspector upon request.

Four (4) Hours:

For Hot & Cold Foods:

1. Initial temperature of food shall be 135°F or greater or 41°F or less.
2. Food is marked or otherwise identified to indicate the time that is 4 hours past the point in time that the food was removed from temperature control.
3. Food is used or served within the 4 hours. Food not served or used within 4 hours must be discarded. It cannot be put back into the refrigerator.
4. Food in unmarked containers or food past the 4 hour time period shall be discarded by the food establishment.

Six (6) Hours:

For Cold Foods Only:

1. Initial temperature of food shall be 41°F or less.
2. Food shall be monitored to ensure the temperature does not exceed 70°F.
3. Food is marked or otherwise identified to indicate the time that is 6 hours past the point in time that the food was removed from temperature control.
4. Food is used or served within 6 hours. Food not served or used within 6 hours must be discarded. It cannot be put back into the refrigerator.
5. Food in unmarked containers or food past the 6 hour time period or over 70°F shall be discarded by the food establishment.
